

GradAID

AI-Powered Educational Consultant

Team Responsibilities & Achievements

Backend Developer **Joseph Rissman**

- Manage Convex server prod/dev environments.
- Refactor and maintain server functions (backend codebase).
- Manage Clerk deployment and integration with React/Convex.
- Ensure server functions pass unit and integration tests.
- Create and manage Sign In, Sign Out, Program Search, Saved Programs, Application, FAQ, Contact, Feedback, and Legal pages.

Frontend Developer **Yue Zhang**

- Manage website deployment on Netlify with frontend testing.
- Ensure consistent experience across the website with modern design for mobile and desktop.
- Generate documents with OpenAI API through convex service and store results.
- Create and manage Landing Page, Dashboard, Onboarding, User Profile, Application Detail, Documents, Document Editor, User Activity, and Application Timeline pages.

LLM Developer **Nitin Krishna Bojji**

- Write a custom prompt to personalize AI generation.
- Web scrape university and graduate program data, manually entering missing data.

Product Features

Need to Have

- ✓ As an aspiring graduate student, I need to provide information about myself through an interactive form.
- ✓ As a multi-device user, I need to log in so that my activity and history are saved and synchronized across all devices.
- ✓ As an applicant applying to many graduate programs, I need automated document creation based on my university choice so that I can focus more on my application strategy.
- ✓ As a mid-career professional seeking a graduate degree abroad, I need to have my diverse background reflected in my SOP.
- ✓ As a global applicant with limited internet access, I need to interact with GradAid in a web browser on my phone.
- ✓ As a privacy-conscious user, I need data encryption and security measures so that my personal information is protected from unauthorized access and potential leaks.

Want to Have

- ✓ As an applicant needing to update my application materials, I want to quickly find my relevant documents.
- ✗ As an applicant preparing documents for various universities, I want to specify the format of downloaded documents.
- ✓ As an applicant managing multiple university applications, I want a system for tracking application deadlines so that I can ensure timely submissions and avoid missing critical dates
- ✓ As someone that struggles with organization and planning, I want a feature for tracking the progress of my applications so that I can stay informed about their status and manage any required follow-up actions.
- ✓ As a prospective graduate student exploring various academic options, I want to interactively search through university programs and save them to a personalized list.

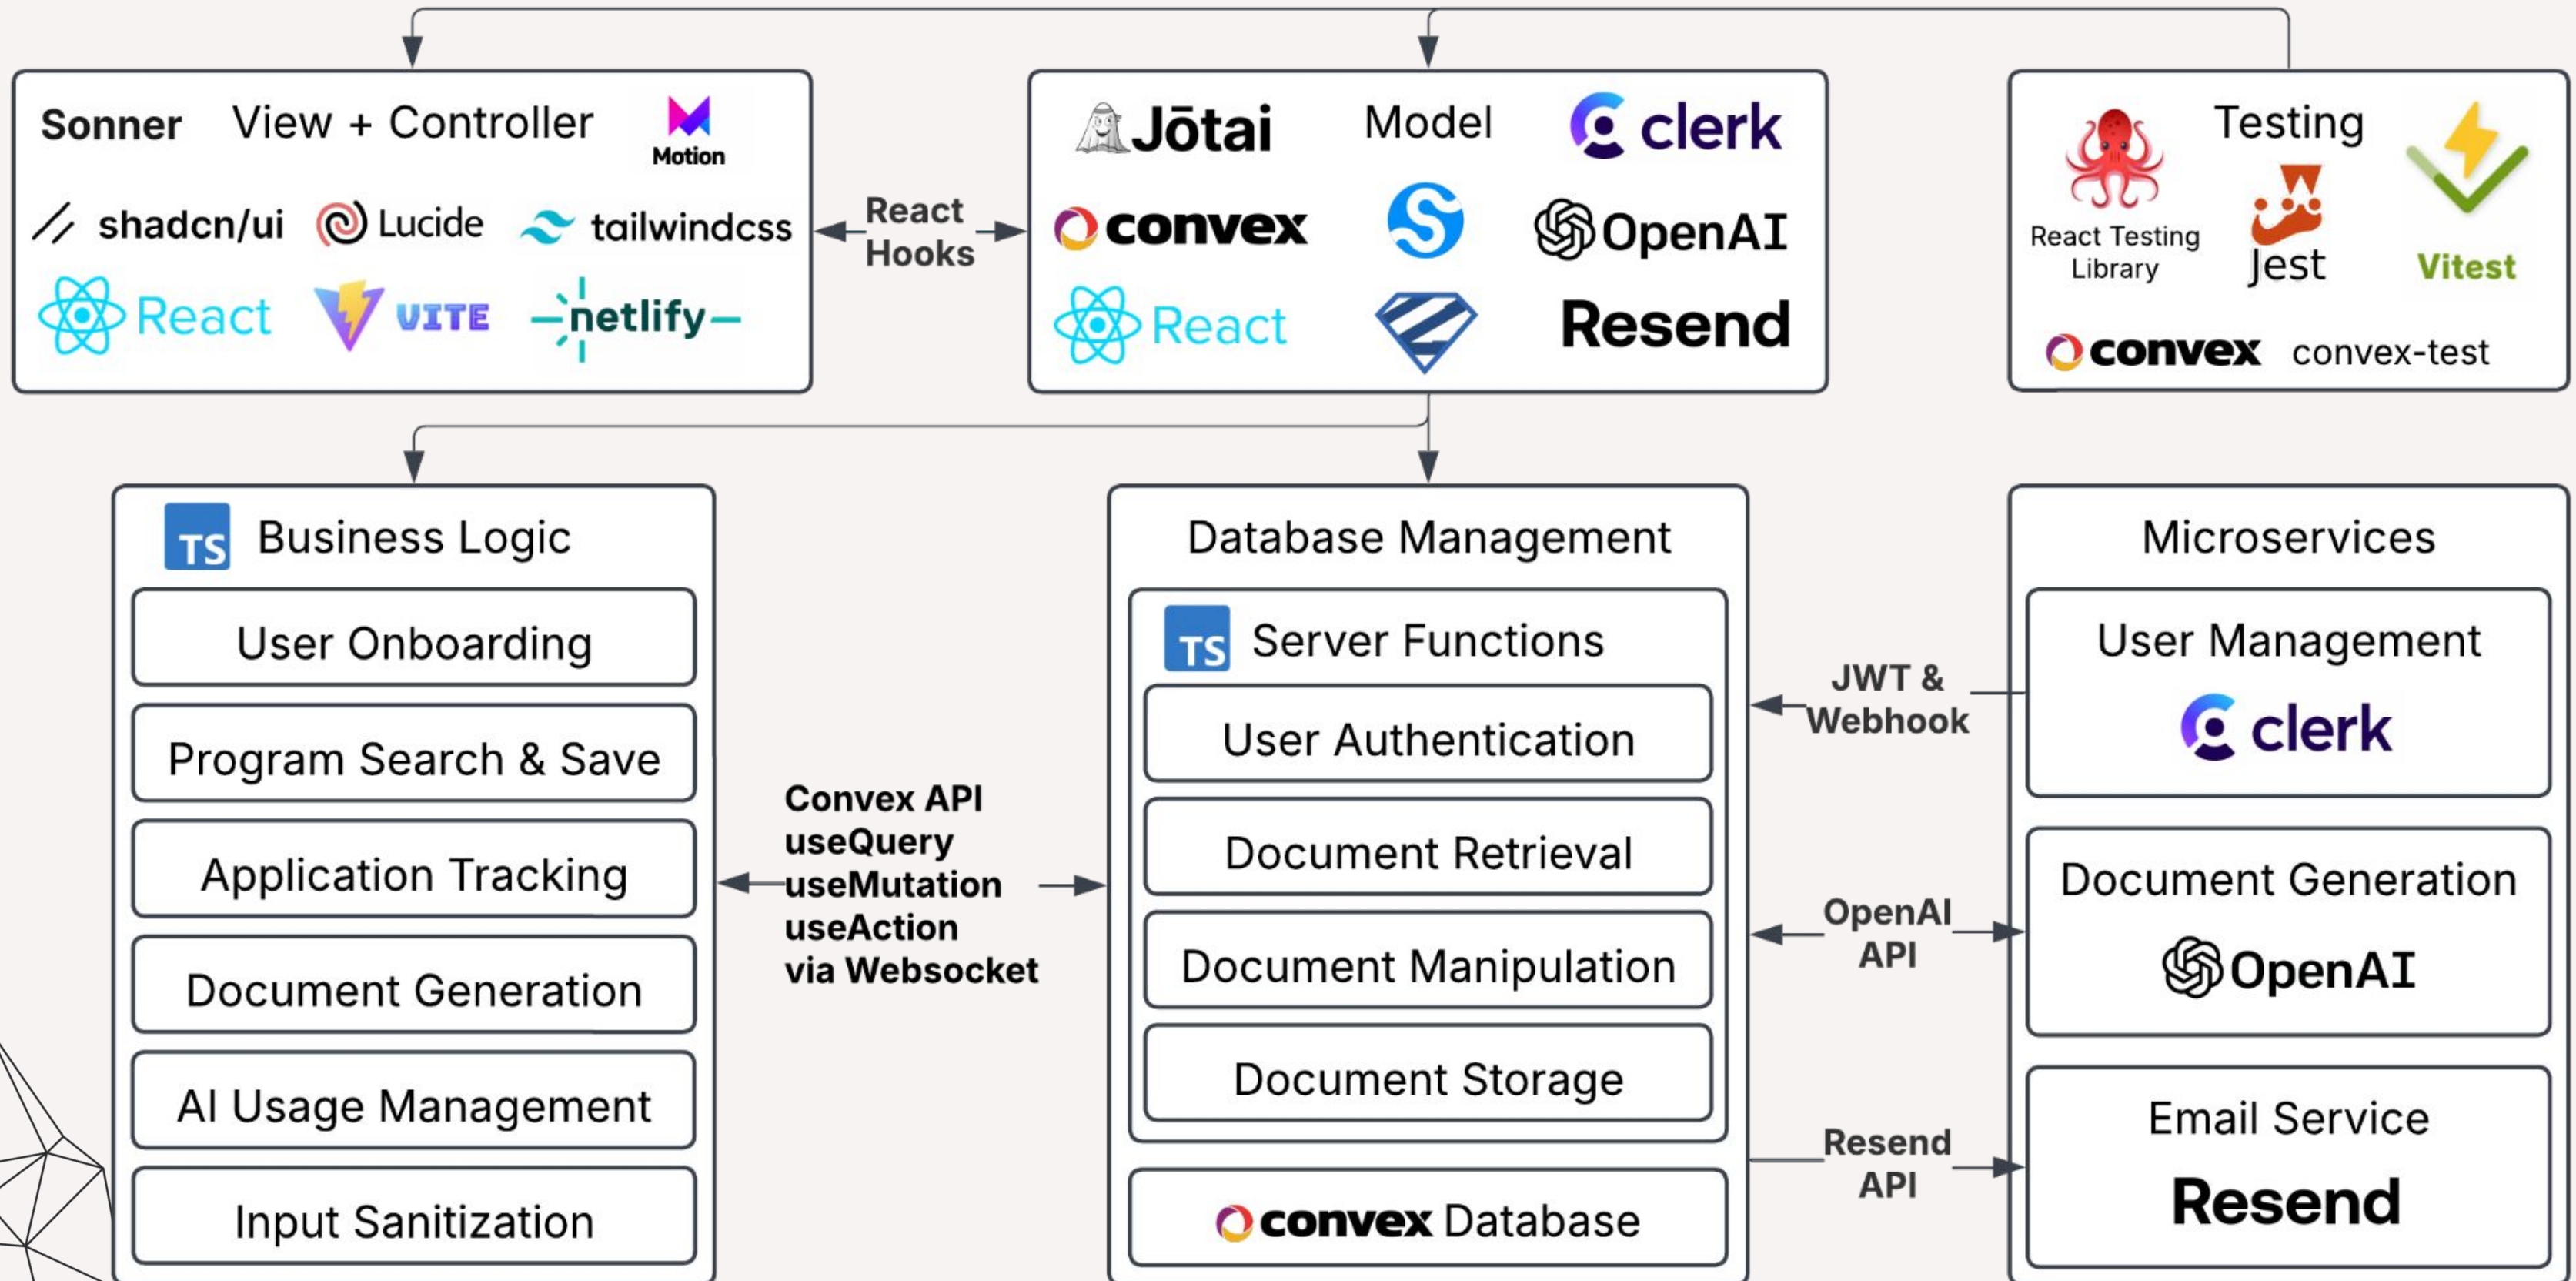

Nice to Have

- ✗ As an applicant with accessibility needs, I want GradAid to have speech recognition and speech generation capabilities.
- ✓ As a user with limited computer literacy, I want the GradAid website to be inviting with a modern design.
- ✓ As someone who has gained a new qualification, I want to be able to update my SOPs and LORs so that my new accomplishment is included.
- ✗ As a prospective graduate student, I want to receive a shortlist of universities based on my experience and accomplishments.

User Feedback

I was really impressed by the application filter and how quickly it churned out results. I also appreciated how I could filter by region and how it provided so much info about the requirements (GPA, tests needed, etc) — **wish something like this had been around when I was applying!**

The UI is **clean and visually appealing**, which made the experience enjoyable. One small improvement could be making some of the buttons or menus more intuitive or easier to spot—just to enhance usability even more.

The LOR and SOP provided were exceptionally well-written and **tailored to my background and aspirations**. I appreciate the quality, attention to detail, and quick turnaround. Thank you for the support.

Very smooth, **i wish i had this when i was applying to schools**
works both on mobile and computer

Super clean design and very **easy to navigate**. This would be really useful when applying to multiple universities to keep track of deadlines and completed essays. Maybe you guys could think of continuing this to job application tracker? But overall, really well done!

It was easy enough to set up my profile, and searching for programs seemed intuitive. Website design feels **simple and slick**, so as a new user with no outside help I didn't have any issues navigating.

The website was **easy to navigate**, everything loaded quickly, and I was able to find exactly what I needed without any hassle. Great user experience overall
