each school

40,989

Educational
consultants in
India in 2025

\$1,000

Typical cost for
educational consultant
services
in India

Target Customer

The target customer of GradAid is international students who are currently applying for or will soon begin applying for higher education in the United States. These students are either already using educational consultancy services and looking for a cheaper alternative or are curious about using educational consultancy services but want something more tailored to their own experiences and accomplishments.

Example Customer Story 1

Hassan plans to get a graduate degree to change fields and follow his true passion - solving climate change.

Example Customer Story 2

Lakshmi just graduated at the top of her class! She's ready for the next step in her educational journey.

What Makes Us Unique

- LLMs fine-tuned to create individualized support for each student.
- Low-cost option with the most advanced AI models.
- Available to students at any time of day with instant responses.

Product Description

The Problem

- Complex Application Process
- High Consultancy Fees
- Lack of Personalization

Our Solution GradAid

- AI-powered web platform
- Automates SOP & LOR writing
- Recommends universities
- Affordable, fast, and accessible 24/7

Key Features & Impact

Core Features

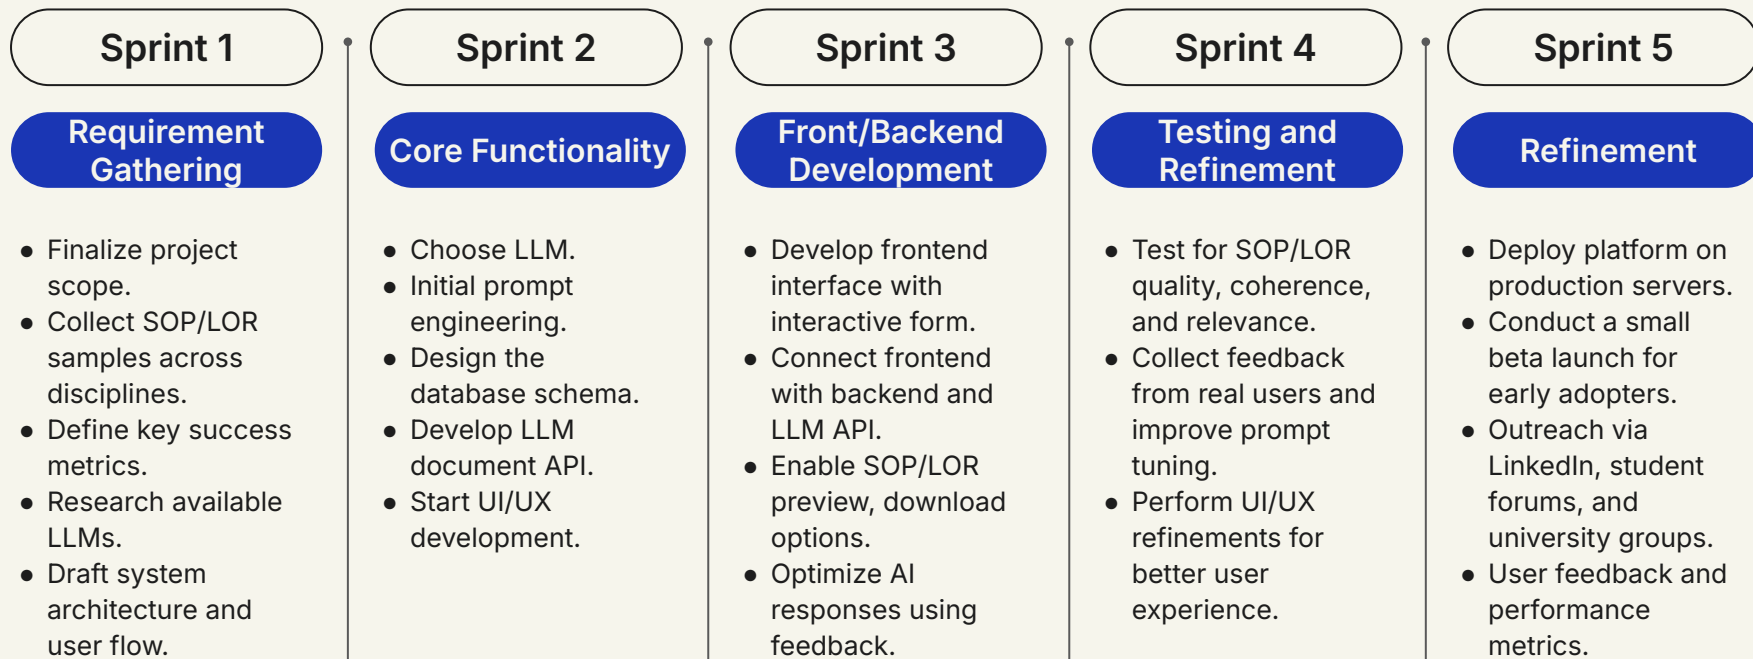

- Interactive Form
- AI-Generated SOPs & LORs
- Recommends universities
- Download & Format Options
- Affordable, fast, and accessible 24/7

Impact

- Lower Costs
- Saves Time
- Empowers Students

Project Timeline

Functional Features

Must Have

- Users can input their information through an **interactive form**.
- User data is securely **stored in a database** for document generation.
- The system generates **Statements of Purpose (SOPs)** and **Letters of Recommendation (LORs)** tailored to user input.
- Users can interact with the product via a **web browser**.
- Generated documents can be **downloaded** in standard formats.

Want to Have

- **User history** is cached and saved across sessions for a seamless experience.
- The system generates a **personalized list of graduate schools** based on the user's profile.
- Users can choose from multiple **download formats** for their documents.

Nice to Have

- **User accounts and login**, allowing history to be saved across devices.
- A **modern, visually appealing website** to enhance user experience.
- **Speech recognition and text-to-speech capabilities** for accessibility and ease of use.
