

GradAID

AI-Powered Educational Consultant

Meet the Team

Backend Developer **Joseph Rissman**

Joseph's focus for this project is developing and maintaining the database, integrating it with the other components to ensure a smooth flow of data. He is working to ensure user data security by implementing role access control measures at the database level.

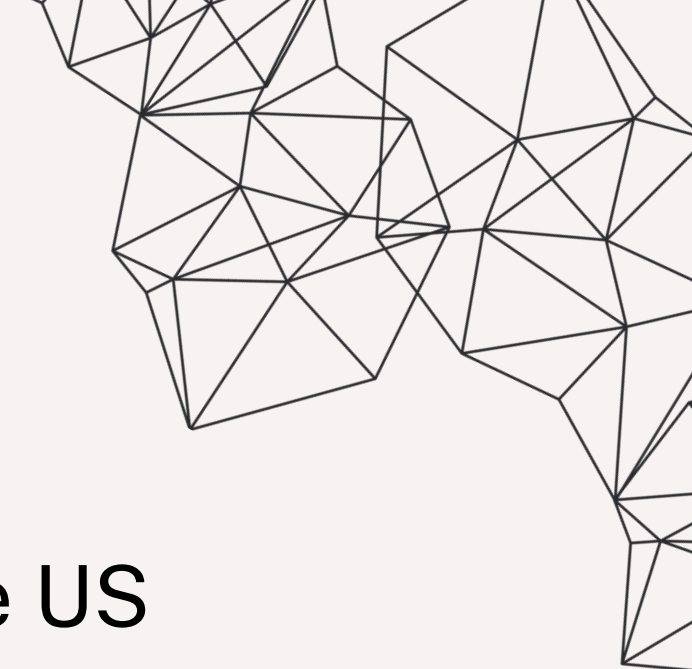

Frontend Developer **Yue Zhang**

Yue is developing the frontend, ensuring a smooth and intuitive user experience. He also works on backend API integration and user authentication, enabling secure sign-in and seamless communication between the UI and database. He ensures application security by implementing input validation on all website components.

LLM Developer **Nitin Krishna Bojji**

Works with LLM and agentic AI to integrate these technologies into our platform, automating the creation of SOPs and LORs for master's students. His focus is on enhancing performance, scalability, and security to ensure a responsive and reliable user experience.

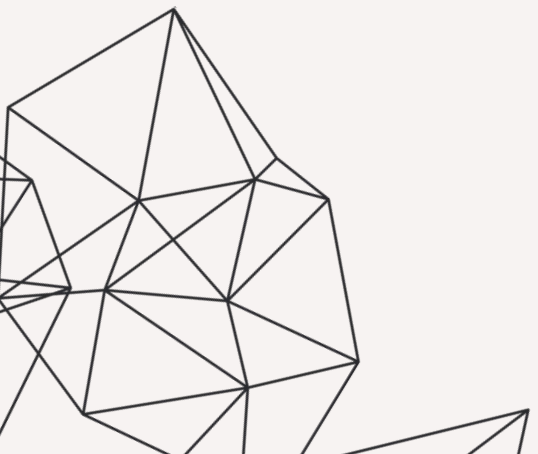

Product Vision

For international students planning to attend graduate school in the US **who** need to draft documentation required for their applications.

GradAid is an AI Driven Service Provider **that** provides students with freedom to be creative and tailor stories to their individual needs at a low-cost. **Unlike** educational consultancies, **our product** is available to users at any time and at a lower cost.

Personas & Scenarios

01 LI LEI

- 24-year-old graduate student from China.
- Determined to pursue a PhD in the United States.
- Relies on GradAid to generate professional, tailored documents.

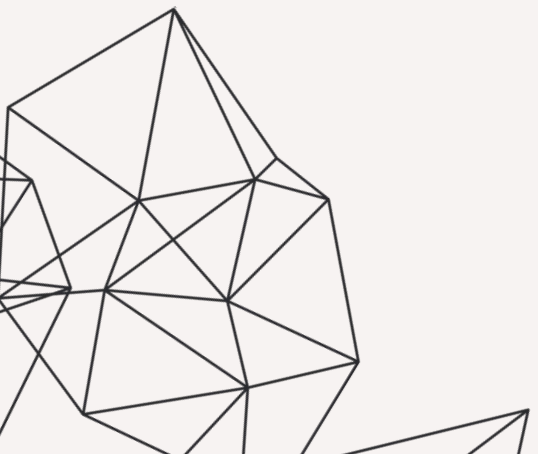

02 ASTHA JAIN

- 28-year-old professional from Jaipur, India.
- Aims to pursue a graduate degree in a field like computer science or finance in the U.S.
- Seeks guidance to articulate her diverse experiences in a compelling SOP.

03 CARLOS MENDOZA

- 26-year-old software engineer from Mexico.
- Plans to pursue an MS in Artificial Intelligence in the U.S.
- Turns to GradAid for help in showcasing his research potential effectively.

Product Features

Need to Have

- ✓ As an aspiring graduate student, I need to provide information about myself through an interactive form.
- ✓ As a multi-device user, I need to log in so that my activity and history are saved and synchronized across all devices.
- ⚠ As an applicant applying to many graduate programs, I need automated document creation based on my university choice so that I can focus more on my application strategy.
- ⚠ As a mid-career professional seeking a graduate degree abroad, I need to have my diverse background reflected in my SOP.
- ✓ As a global applicant with limited internet access, I need to interact with GradAid in a web browser on my phone.
- ✓ As a privacy-conscious user, I need data encryption and security measures so that my personal information is protected from unauthorized access and potential leaks.

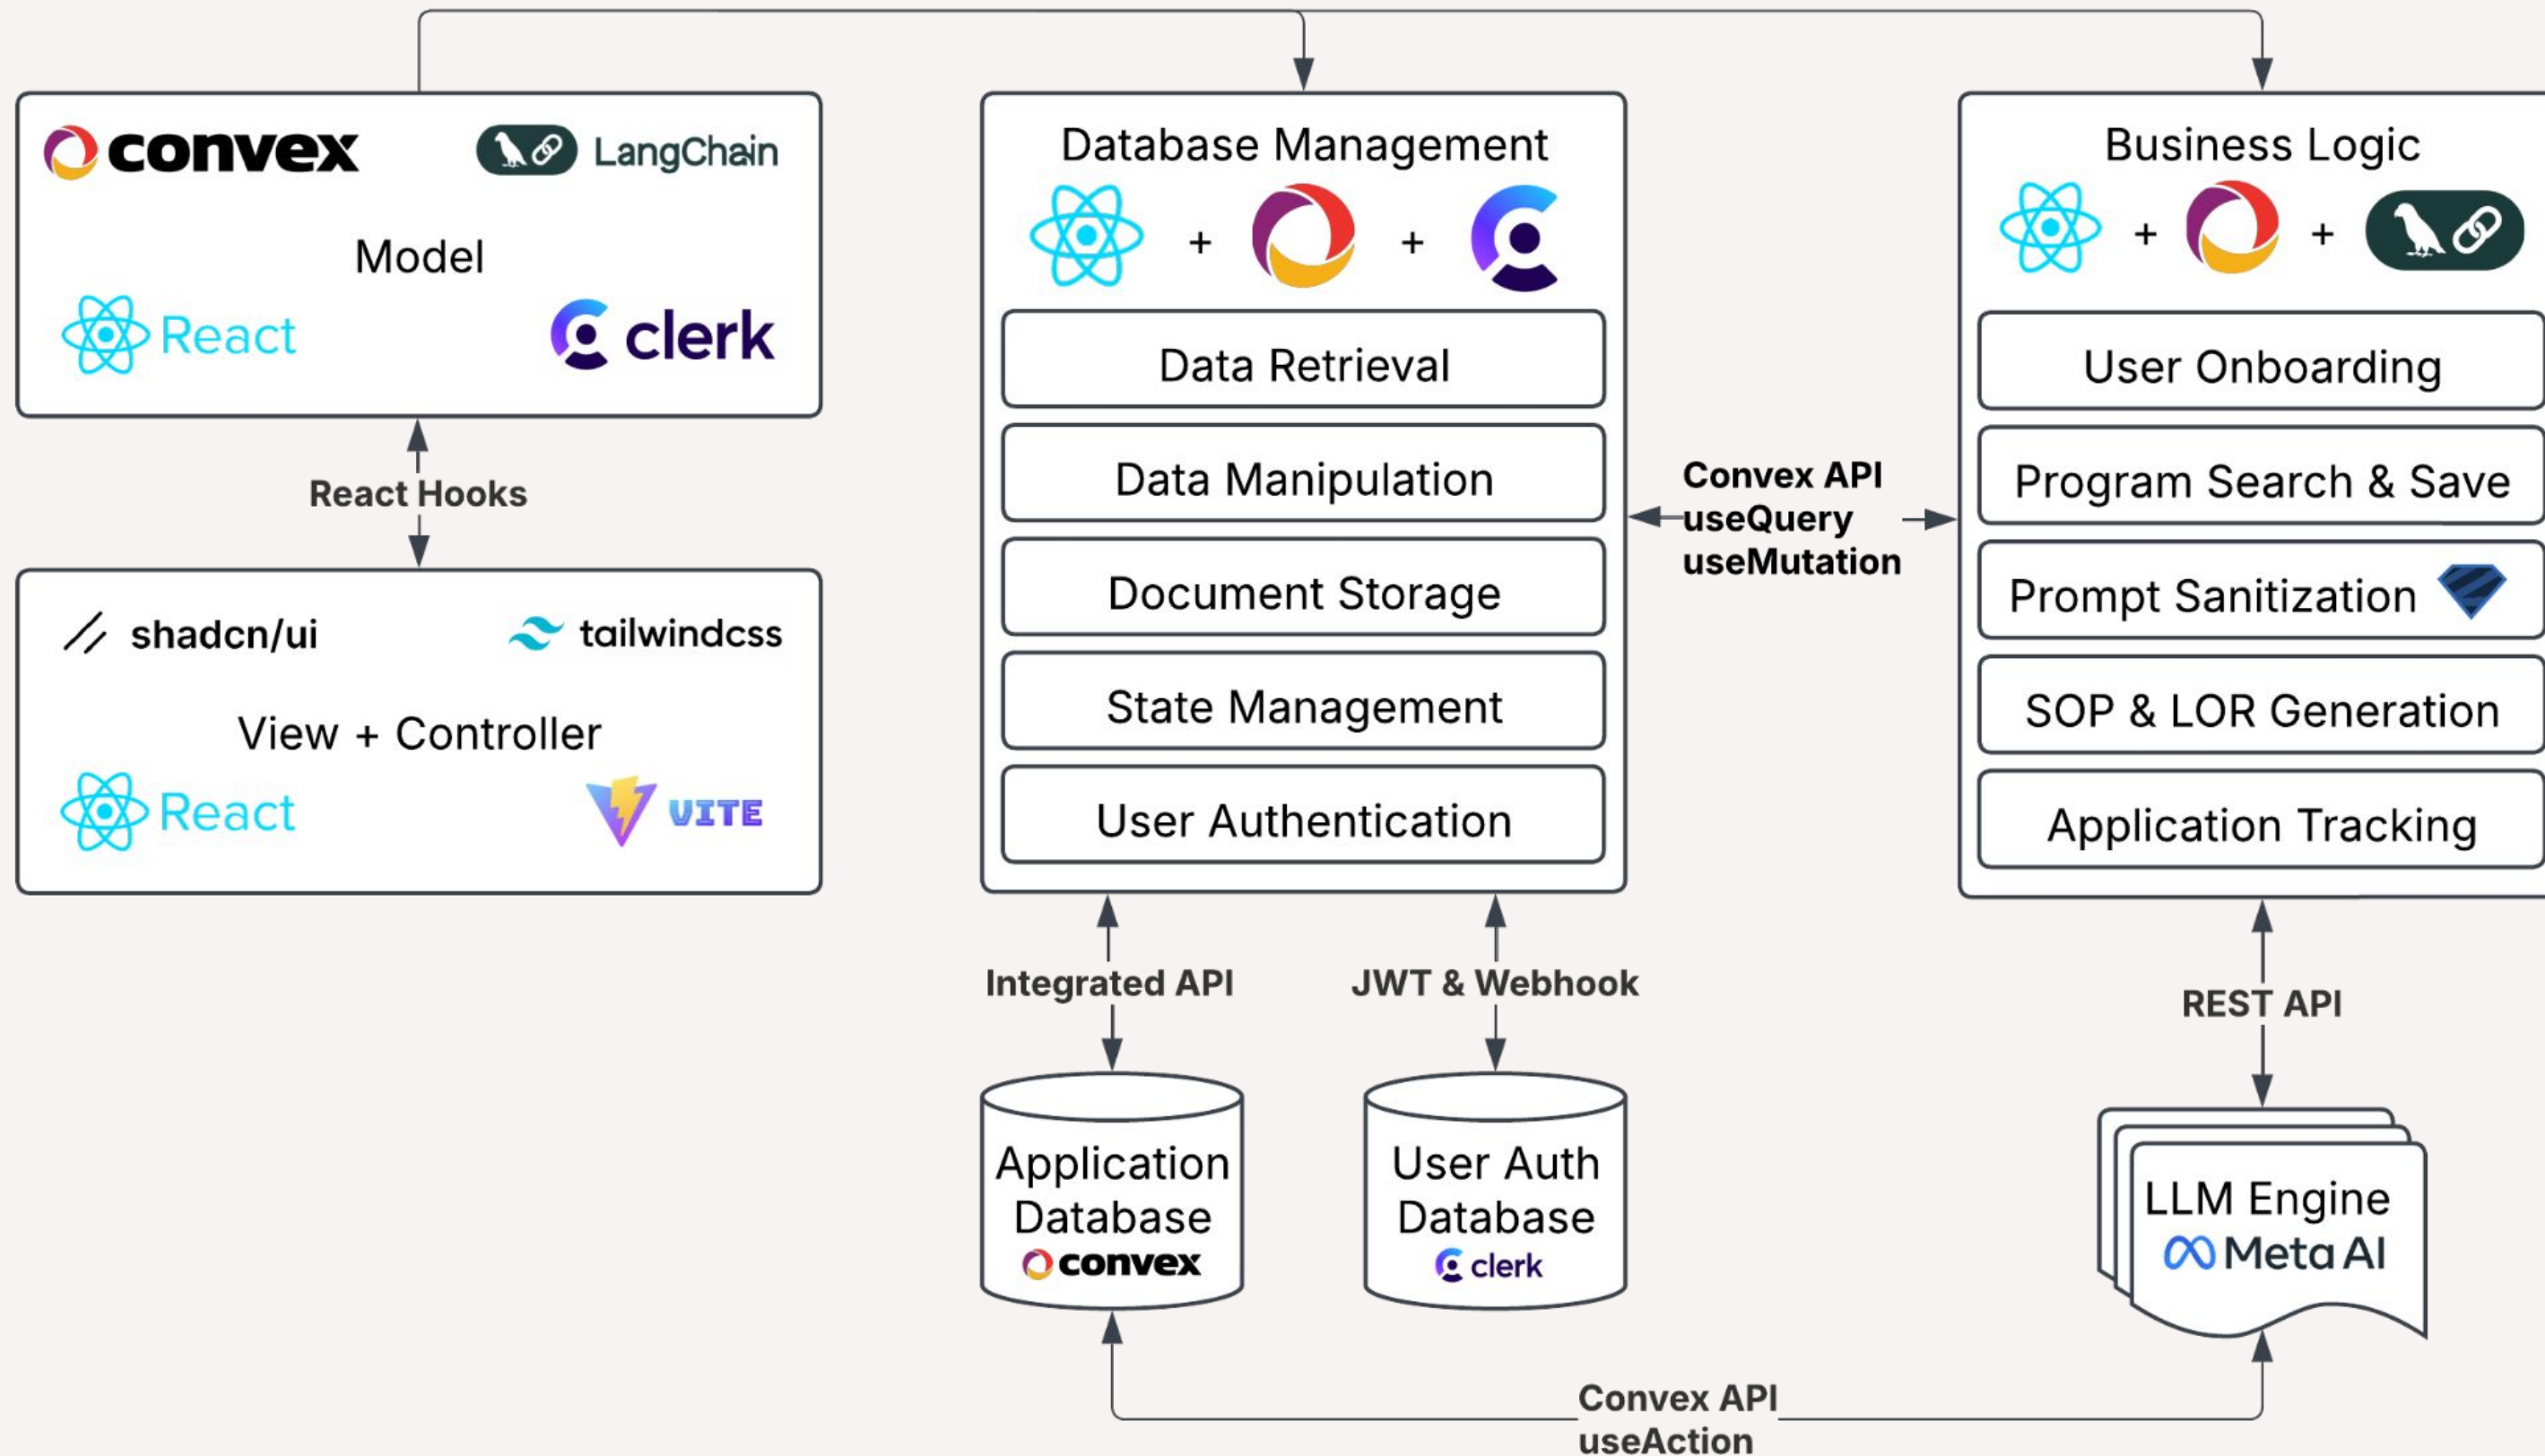

Want to Have

- ✓ As an applicant needing to update my application materials, I want to quickly find my relevant documents.
- ✗ As an applicant preparing documents for various universities, I want to specify the format of downloaded documents.
- ⚠ As an applicant managing multiple university applications, I want a system for tracking application deadlines so that I can ensure timely submissions and avoid missing critical dates
- ✓ As someone that struggles with organization and planning, I want a feature for tracking the progress of my applications so that I can stay informed about their status and manage any required follow-up actions.
- ✓ As a prospective graduate student exploring various academic options, I want to interactively search through university programs and save them to a personalized list.

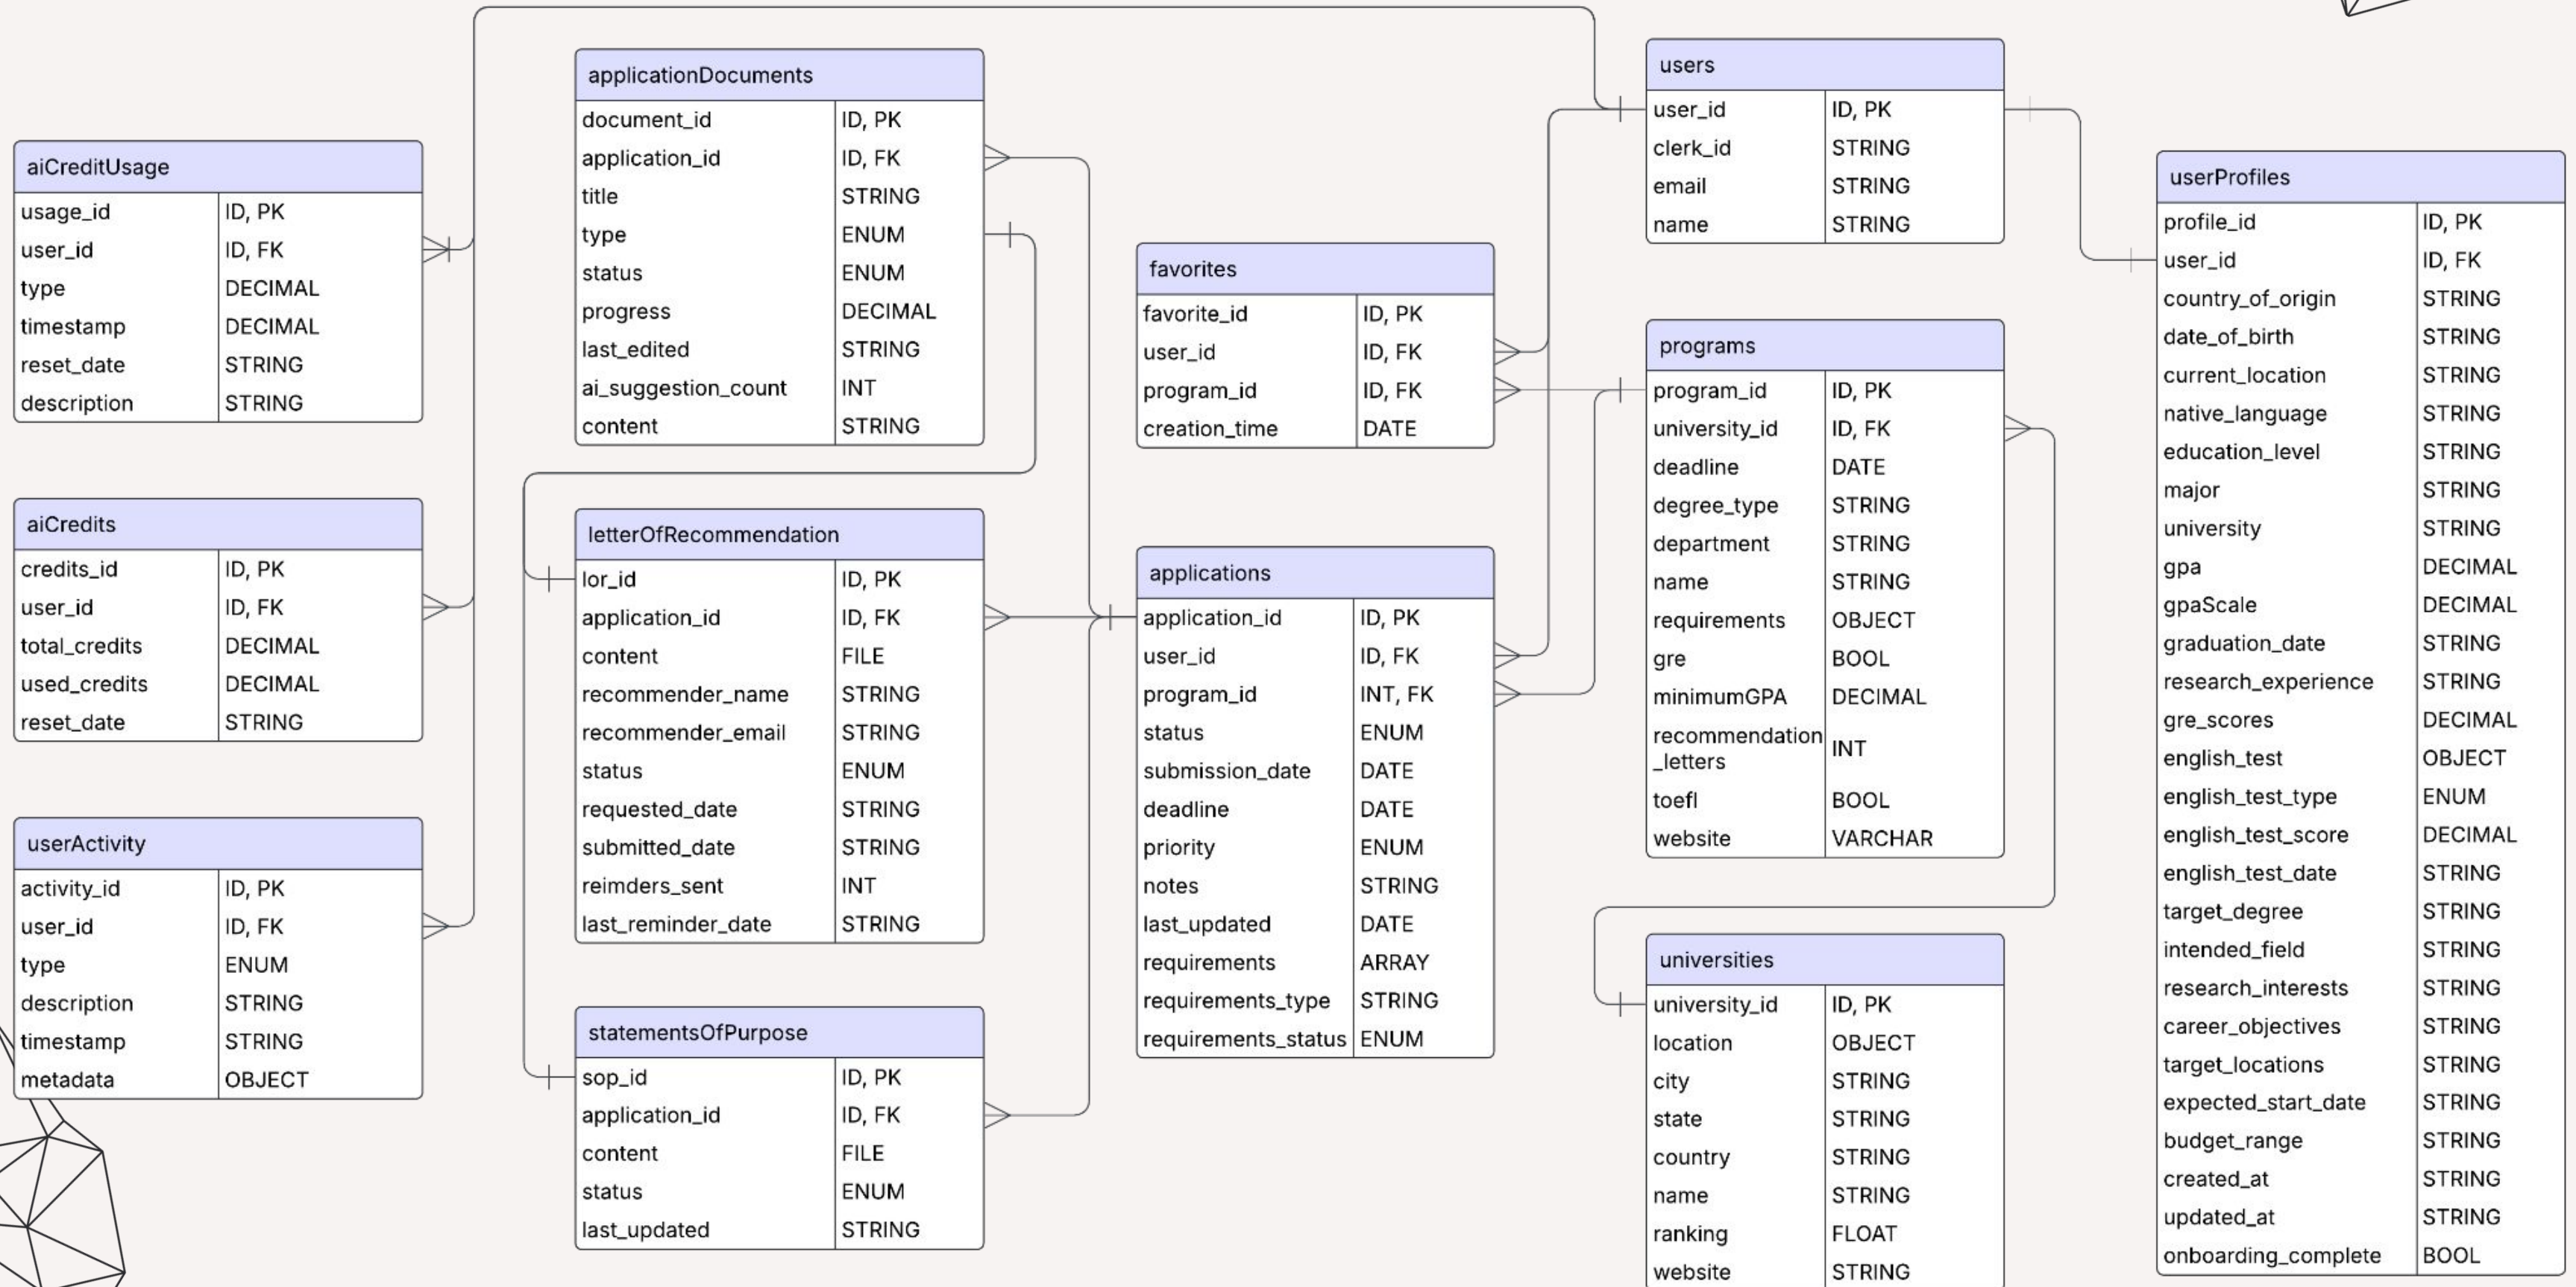

Nice to Have

- ✗ As an applicant with accessibility needs, I want GradAid to have speech recognition and speech generation capabilities.
- ✓ As a user with limited computer literacy, I want the GradAid website to be inviting with a modern design.
- ⚠ As someone who has gained a new qualification, I want to be able to update my SOPs and LORs so that my new accomplishment is included.
- ✗ As a prospective graduate student, I want to receive a shortlist of universities based on my experience and accomplishments.

Updated Risk Assessment

Skills Gap in Web Development

✅ **Resolved** – Team now proficient (enough) in React, Convex, Clerk, Typescript, and Webhooks.

🔧 Continued learning for LangChain integration underway.

Tool Familiarity

✅ **Resolved** – Convex and Clerk fully integrated.

🚧 LLM training/integration still in progress.

📌 Plan: Finalize LLM triggers, test end-to-end document generation.

Time Constraints

⚠️ **Ongoing** – Team balancing coursework and jobs.

✅ MVP milestone achieved through focused collaboration and pair coding.

📌 Plan: Prioritize key features, microtask remaining work, finalize demo.

Thank you!
